

Micah Longmire

Senior DevOps Engineer / Manager

Roy, UT | mlmicahlongmire@gmail.com | github.com/bobbyhiddn | linkedin.com/in/micah-longmire

1 Professional Summary

Senior DevOps Engineer / Manager who transforms ambiguous requirements into secure, automated cloud platforms and high-performing teams. Combines deep IaC expertise with servant-leadership to modernize legacy estates, tighten security, and deliver value on aggressive schedules. Proven record of elevating DevOps maturity, mentoring engineers, and driving continuous-delivery culture for mission-critical programs. Brings additional value through professional multimedia production skills, including executive demos and stakeholder-facing technical media.

2 Core Competencies

- **IaC / CaC** Terraform, Ansible, AWS SSM, CloudFormation
- **CI/CD** GitLab Runners, Argo CD, Github Actions
- **Containers** Docker, Kubernetes, Iron Bank
- **Languages** Python, Go, JavaScript, PowerShell, Bash
- **Cloud Platforms** AWS, Linode, Azure, GCP
- **Local Virtualization** VMware Horizon & VxRail, KVM
- **Artifact Repos** Nexus, S3
- **Security & Compliance** STIG automation, least-privilege networking
- **Domain Administration** Active Directory, Group Policy, realm, DNS, Kerberos, LDAP integration
- **Leadership** Road-mapping, sprint and quarterly planning, mentoring, cross-team coordination
- **Process & Tools** Agile/Scrum, Jira, Confluence, ServiceNow, technical documentation
- **Multimedia & Demo Production** Video scripting, filming, editing, and presentation for technical audiences; stakeholder communications; internal training materials

3 Professional Experience

3.1 Senior DevOps Engineer / Manager

Accenture Federal Services – Roy, UT (*Feb 2023 – Present*)

- Led architecture and accreditation of a code-driven cloud development environment—from blank repo to full security approval—now the template for future initiatives.
- Built an enterprise IaC framework adopted across multiple product and operations teams; reduced infrastructure deployment time from weeks to days to hours.
- Managed and mentored 4 DevOps squads: backlog grooming, velocity tracking, performance coaching, and stakeholder reporting.
- Automated OS upgrades and hardening across a multi-environment fleet, eliminating weeks of manual effort and raising compliance scores.
- Streamlined Terraform + Ansible pipelines, cutting deploy times while improving auditability and rollback.
- Drove emergent AI utilization through pipelines, terminals, and home-grown tooling through both local and cloud-hosted models.
- Produced executive-level demonstrations and technical walkthroughs using professional-grade video editing and scripting.

3.2 DevOps Engineer

Northrop Grumman – Roy, UT (*Oct 2022 – Feb 2023*)

- Introduced Infrastructure-as-Code to a new VDI platform, enabling consistent multi-site roll-outs.
- Authored Python automation that integrated with internal APIs, halving manual maintenance time.
- Delivered executive-level demos and knowledge transfers, setting the standard for follow-on DevOps projects.

3.3 Systems Engineer

Northrop Grumman – Roy, UT (*Feb 2022 – Oct 2022*)

- Guided deployments of VMWare virtualization and analytics suites under aggressive deadlines.
- Produced transition packages and SOPs to accelerate hand-off to operations teams.

3.4 Computer Systems Analyst

Northrop Grumman – Roy, UT (*2020 – 2022*)

- Supported large-scale disaster-recovery efforts, virtualizing critical workloads and restoring services ahead of schedule.

- Served as primary admin for a secure VDI estate, tuning policies and optimizing performance.

3.5 IT Support Technician III

Northrop Grumman – Roy, UT (2018 – 2020)

- Packaged, tested, and deployed software to classified client systems; maintained outage and recovery runbooks.

3.6 Mass Communications Specialist — 46S

Army National Guard – Jackson, MS (2016 – 2021)

- Produced multimedia content for nationwide distribution; interviewed senior military and state leadership.
- Led video production from scripting to editing for public affairs, training, and executive communication.

3.7 IT Service Technician

Peak Solutions – Brandon, MS (2014 – 2018)

- Performed on-site repairs, patching, and end-user training for small-business clients.

4 Certifications

- Top-Secret Security Clearance (Active)
- Security+ – CompTIA (2019 – 2025)
- ITIL v4 Foundations – AXELOS (2019)

5 Education

- Defense Information School, Fort Meade MD — MOS Certification (2018)
- Vancleave High School, Vancleave MS — Diploma (2013)
