Micah Longmire

Senior DevOps Engineer / Manager who transforms ambiguous requirements into secure, automated cloud platforms and high-performing teams. Combines deep IaC expertise with servant-leadership to modernize legacy estates, tighten security, and deliver value on aggressive schedules.

Core Competencies

IaC / CaC Terraform, Ansible, AWS SSM, CloudFormation
CI/CD GitLab Runners, Argo CD, Github Actions
Containers Docker, Kubernetes, Iron Bank
Languages Python, Go, JavaScript, PowerShell, Bash
Cloud Platforms AWS, Linode, Azure, GCP
Local Virtualization VMware Horizon & VxRail, KVM
Artifact Repos Nexus, S3
Security & Compliance STIG automation, least-privilege networking
Domain Administration Active Directory, Group Policy, realm, DNS, Kerberos, LDAP integration
Leadership Road-mapping, sprint and quarterly planning, mentoring, cross-team coordination
Process & Tools Agile/Scrum, Jira, Confluence, ServiceNow, technical documentation
Multimedia & Demo Production Video scripting, filming, editing, and presentation for technical audiences; stakeholder communications; internal training materials

Professional Experience

Senior DevOps Engineer / Manager | Accenture Federal Services – Roy, UT *(Feb 2023 – Present)*

- Led architecture and accreditation of a code-driven cloud development environment—from blank repo to full security approval—now the template for future initiatives.
- Built an enterprise IaC framework adopted across multiple product and operations teams; reduced infrastructure deployment time from weeks to days to hours.
- Managed and mentored 4 DevOps squads: backlog grooming, velocity tracking, performance coaching, and stakeholder reporting.
- Automated OS upgrades and hardening across a multi-environment fleet, eliminating weeks of manual effort and raising compliance scores.

- Streamlined Terraform + Ansible pipelines, cutting deploy times while improving auditability and rollback.
- Drove emergent AI utilization through pipelines, terminals, and home-grown tooling through both local and cloud-hosted models.
- Produced executive-level demonstrations and technical walkthroughs using professional-grade video editing and scripting.

DevOps Engineer | Northrop Grumman – Roy, UT *(Oct 2022 – Feb 2023)*

- Introduced Infrastructure-as-Code to a new VDI platform, enabling consistent multi-site rollouts.
- Authored Python automation that integrated with internal APIs, halving manual maintenance time.
- Delivered executive-level demos and knowledge transfers, setting the standard for follow-on DevOps projects.

Systems Engineer | Northrop Grumman – Roy, UT *(Feb 2022 – Oct 2022)*

- Guided deployments of VMWare virtualization and analytics suites under aggressive deadlines.
- Produced transition packages and SOPs to accelerate hand-off to operations teams.

Computer Systems Analyst | Northrop Grumman – Roy, UT *(2020 – 2022)*

- Supported large-scale disaster-recovery efforts, virtualizing critical workloads and restoring services ahead of schedule.
- Served as primary admin for a secure VDI estate, tuning policies and optimizing performance.

IT Support Technician III | Northrop Grumman – Roy, UT *(2018 – 2020)*

- Packaged, tested, and deployed software to classified client systems; maintained outage and recovery runbooks.

Mass Communications Specialist — 46S | Army National Guard – Jackson, MS *(2016 – 2021)*

- Produced multimedia content for nationwide distribution; interviewed senior military and state leadership.
- Led video production from scripting to editing for public affairs, training, and executive communication.

IT Service Technician | Peak Solutions – Brandon, MS *(2014 – 2018)*

- Performed on-site repairs, patching, and end-user training for small-business clients.

Certifications & Education

Certifications Top-Secret Security Clearance (Active)
Security+ – CompTIA (2019 – 2025)

ITIL v4 Foundations – AXELOS (2019)

Education Defense Information School, Fort Meade MD — MOS Certification (2018)

Vancleave High School, Vancleave MS — Diploma (2013)
